### ABSTRACT

This report, which combined Part I and Part II of a benefit study, presents data from a survey of Ontario universities concerning fringe benefits offered in 1991-92. Part I is made up of a series of tables displaying the information on particular benefits institution-by-institution. The first five tables cover general aspects of benefits, including administration and insurance plans, communication of benefits, proposed changes, provision of life and dismemberment insurance, and maternity leave policy. Subsequent tables offer details of supplementary health insurance, long-term disability, sick leave entitlement, sick leave-benefits continuance, long-term disability-benefits continuance, life insurance, survivor benefits, dental plans, post-retirement benefits, vacation entitlement, sabbatical leave policies, housing loan (mortgage) policies, free tuition policies, parking policies, access to athletic facilities, and day care. The institutions surveyed include the following: (1) Brock University, (2) Carleton University, (3) University of Guelph, (4) Lakehead University, (5) Laurentian University, (6) McMaster University, (6) Ontario Institute of Studies in Education, (7) University of Ottawa, (8) Queen's University, (9) Ryerson Polytechnical Institute, (10) University of Toronto, (11) Trent University, (12) University of Waterloo, (13) University of Western Ontario, (14) Wilfrid Laurier University, (15) University of Windsor, and (16) York University. Part II, which surveys the same universities, presents data on pensions offered in 1991-92. Results are indicated by type of plan, eligibility, member contributions, university contributions, benefits, indexing, and standard options. The bulk of the document is made up of a series of tables displaying the information on particular universities institution-by-institution. Each table details type of plan, eligibility, member contribution, university contribution, benefits, a model calculation, and information on the performance and management of the fund. A final section details early retirement options. (JB)

#### Staff:

Provisions for Maternity Leave are set out in the Employment Standards Act (Ontario) which provides for leave without pay for a pariod of 17 weeks.

A staff member who has been employed for 13 weeks is entitled to return to her previous position or a position of a comparable nature without a reduction in salary. The staff member may initiate the leave within eleven weeks of the expected date of delivery. She must provide two weeks written notice of her intention to take the leave and provide the university with a doctor's statement which sats out the expected date of delivery.

She may not return to work for a period of six weeks following delivery unless her doctor provides written consent to return within the six week period. The University may provide extensions to the above periods of leave as they are requested and if they are reasonable under the circumstances,

#### Benefits:

Maternity leave will not affect fringe benefits. Arrangements will be made to have all fringe benefits continue during the period of leave, and the University will make its contributions as usual.

#### Salary:

Current salary will continue for two weeks of maternity leave, and 95% of current salary (less U.I.C. maternity leave benefits) will be provided for up to 15 additional weeks. In the case of medical complications, the employee should apply for sick leave pay and/or long term disability pay. Salary makeup is available to permanent full-time staff who are employed for 12 months and continuously

#### Parental Leave:

#### Faculty:

Eligibility: Those eligible for maternity leave must be full-time faculty employed for at least 13 weeks and continuously employed at Brock University for at least 12 months.

#### Length of Leave:

Normally, maternity leave will be granted for a maximum period of seventeen weeks. Leave may voluntarily be shorter than this period, although if a woman wishes to work before six weeks' post-delivery, a medical certificate is required. If the Pregnancy results in medical complications, leave will be extended, but will not enceed six months in total.

#### Distribution of Leave:

The employee is entitled to begin her maternity leave at any time within eleven weeks before the expected date of birth. She must, however, give the University three months' notice in writing of the date upon which she intends to begin her leave and a madical certificate indicating the expected date of birth. She is entitled to a fixed minimum post-natal leave of six weeks after the actual date of the birth or ending after no more than seventeen weeks from the beginning of the leave, whichever is later.

#### Tenure, Promotion and Merit:

In view of the fact that a maternity leave may reduce the faculty member's time for research and other duties, and hence place her in an unfavourable position with respect to a pending tenure or promotion decision, it is recommended that such decisions may be postponed for a maximum one year at the faculty member's request, regardless of the number of leaves taken during that period. Merit rating decisions shall ignore the period during which a faculty member is on maternity leave.

#### Benefits:

Maternity leave will not affect fringe benefits. Arrangements will be made to have all fringe benefits continue during the period of leave, and the University will make its contributions as usual.

The objective of the Plan is to supplement unemployment insurance benefits up to 95% of regular earnings during the period of maternity - 17 weeks in accordance with the Employment Standards Act (Onterio). Written application and a copy of the Doctor's certificate indicating the expected date of delivery is required at the earliest date prior to commencement of maternity leave. After expiry of maternity leave the staff member is reinstated to her former position with no loss of vacation credit or seniority. Benefit plans are continued through regular payroll deduction with regular subsidies throughout the period of maternity. If a staff member should return to work prior to the required 6 week post delivery period then a letter from a legally qualified medical practitioner is required approving the early return.

In the event that the faculty or administrative staff member is unable or unwilling to make the commitment to return to her duties at the University following her confinement or she will not meet the one year of continuous service as of the expected date of delivery she can request maternity leave without pay for up to a maximum of 17 weeks. The University will continue its regular portion of benefit premiums for the duration of the maternity leave and the employee is required to pay her portion by personal cheque.

### 2) On Early Retirement:

In all plans, early retirament may begin at age 55. In all plans with minimum gaurantees and in all defined benefit plans, the amount of benefits is based on service and earnings to early retirement regardless of when benefits commands. The member normally has a choice of a deferred benefit or annuity beginning at normal retirement or a reduced benefit beginning at early ratirement.

### 3) On Termination:

In all plans, member has choice of (i) daferred benefit payable at normal retirement. (ii) transfer of money purchase fund (in money purchase plans) or twice member's contributions plus interest (in defined benafit plans) to the registered pension fund of a new employer or to an RRSP, or (iii) refund of total account including interest. ### Aftar ratirement:

In all plans, benefit entitlement to the baneficiary is determined by the guaranteed period of benefit payments.

### Model Pension Calculation:

An example of calculation is shown in each case of the pension provided under a defined benefit formula or a minimum guarantee formula. The average best year's earnings (ABYE) was taken as being \$50,000 regardless of the time period over which it was calculated. The example assumes normal retirement at ege 65 with 35 years of service as of December 1, 1991. Annual pensions from the formulae range from \$22,683 at Laurentian to \$35,000.00 at Trent. Thase pensions are in addition to Canada Pension Plan and Old Age Security benefits.

### DESCRIPTION OF TERMS AND ABBREVIATIONS USED

### 1) Pension Plens:

Money Purchase:

employee and employer both contribute a fixed percentage of salary to a fund which is expected to grow through investment. At retirement, this fund is used to purchase and annuity which will provide the annual pension benefits to the employee. There are no specific provisions made for dealing with inflation but these plans are usually fully portable.

Money Purchase with Minimum Guarantee;

employee and employer both contribute specified amounts as in the plan but, in addition, the employer guarantees a minimum pension via a formula such as in the defined benefit plans. At retirement, the employee chooses between the benefits provided by the money purchase and the minimum guarantee. The minimum guarantee component of most plans is indexed to a maximum 2-3% as a means of offsetting inflation. The money purchase component is usually fully portable.

**Defined Benefit:** 

employee contributions are a fixed percentage of salary but employer contributions vary according to actuarial projections of the pension fund. At retirement, the employee receives an annual benefit based on the product of a specified percentage times years of credited service times a specified average salary (usually the average of the best five years' earnings). Most plans are indexed to a maximum 2-3% and are certainly less than fully portable.

2) Pension Benefits:

Variable Annuity:

an annuity which remains constant during any specified pension year but varies from year-to /ear depending on the investment performance during the preceding year of that portion of the pension fund relating to retired members.

Fixed Annuity:

an annuity which remains constant both during any one year and from year-to-year.

Life Only:

benefit which is payable until death at which time payments cease.

Life Guaranteed 60 Months:

a pension benefit which is payable for life but guaranteed 60 months in any event. The benefits may also be guaranteed for 120 or 180 months but the monthly pension payments are usually reduced accordingly.

Joint and Last Survivorship:

a pension benefit which is payable for the member's lifetime then continues to his/her beneficiary for the remainder of that persons lifetime. The monthly pension payments are usually somewhat less than those of the life only or life guaranteed benefits.

3) Abbreviations:

ABYE:

Average Best Years' Earnings found by calculating the average salary over the best five years' earnings, or over the best five of the last ten years' earnings, or over the best five consecutive years' earnings.

YMPE:

Year's Maximum Pensionable Earnings as established each year by the Canada Pension Plan (CPP). For 1991, the YMPE is 30,500.

Ava YMPE:

Average YMPE calculated as an average of the YMPE values for those same years used to calculate the ABYE.

YBE:

Yearly Basic Exemption under C.P.P. For 1991, \$3,000.

EX:

The excess of ABYE over YMPE or avg YMPE.

YS:

Years of credited service.

### **CPP Benefit:**

Annual retirement benefits equal to 25% of the average of the previous 3 years maximum pensionable earnings. For a member who earned at least the amount of the YMPE for each year contributions were made to the CPP, the CPP benefit for a member who retired in 1991 would be \$7,258.32.

## 4) Fund Performance:

Rates of return on investment for different pension plans should not be directly compared since methods of calculating rates of return are many and varied. Unless the method is known, fund performance values of different plans cannot be meaningfully compared.

### 5) Model Pension Calculations:

In calculating the minimum guaranteed annual pension of the annual pension provided by the defined benefit formula, the following assumptions were used:

- i) ABYE = \$50,000
- ii) YS = \$35 years
- iii) YMPE = \$30,500

- i) refund of member's contributions plus interest (for service prior to 1.1.87).
- ii) commuted value of vested pension as lump sum or immediate monthly pension, subject to 50% rule (for service after 1.1.87).

60% of the member's pension is paid to the spouse until death and in any event until the youngest child reaches age 18. Spouses pension is reduced by 2 1/2% for each whole year that the spouses age is more than 10 years less than the member's age.

Assume average salary for best 60 consecutive months is \$50,000 with 35 years credited service to December 31, 1986.

 $35 \times 2 \times 50,000 = $35,000.00$ 

Less C.P.P. reduction factor, YS from January 1, 1966 to December 31, 1987 - 22 years (YMPE 1986 - 25,900)

22 × <u>0.7</u> × 25,900 = \$3.988.60

Therefore pension would be:

- **=** \$35,000.00 3,988.60
- = \$31,011.40
